

Worksheet No. - 1

Student Name: Anjali kumari

Branch: MCA general

Semester: 3rd

Subject Name: TECHNICAL TRAINING-II.

Subject Code: CONT_25CAP-707

UID: 25MCA20023

Section: Group:1/A

Date of Performance: 21st july.

Experiment 1: Study and Analysis of an Online Grocery Delivery Application

1.Aim:

The aim of this project is to create a complete web-based grocery store application that digitizes the traditional grocery shopping process. It focuses on providing customers with a convenient shopping experience while enabling administrators to efficiently manage inventory, orders, and customer information through an easy-to-use dashboard.

2.Objective:

The objective of the **Green Basket** project is to develop a secure, responsive, and user-friendly online grocery shopping platform that enables customers to browse products, manage their shopping cart, place orders, make payments, and track deliveries efficiently. The system also provides an admin interface for managing products, categories, customers, and orders while improving the overall grocery shopping experience.

3.Task to be done :

- Design the database and ER Diagram.
- Develop a responsive user interface using HTML, CSS, Bootstrap, and JavaScript.
- Implement user registration and login authentication.
- Create product and category management modules.
- Develop product search and filtering functionality.
- Implement shopping cart and wishlist features.
- Build the checkout and payment module.
- Develop order management and delivery tracking systems.
- Integrate MySQL database with PHP backend.
- Test the application for functionality, usability, and security.
- Deploy and document the project.

4.Hardware Resources:

- Laptop/Desktop
- Minimum 8 GB RAM
- Intel Core i3/i5 Processor or equivalent

Software Requirements

- Windows 10/11
- XAMPP Server
- Visual Studio Code
- PHP
- MySQL
- phpMyAdmin
- Bootstrap 5
- HTML5
- CSS3
- JavaScript

5.Procedure/ Algorithm:

```
<!DOCTYPE html>
<html lang="en">
<head>
  <meta charset="UTF-8">
  <meta name="viewport" content="width=device-width, initial-scale=1.0">
  <title>Green Basket</title>
  <link href="https://cdn.jsdelivr.net/npm/bootstrap@5.3.3/dist/css/bootstrap.min.css" rel="stylesheet">
</head>
<body>

<nav class="navbar navbar-expand-lg navbar-success bg-success">
  <div class="container">
    <a class="navbar-brand text-white fw-bold" href="#">
      □ Green Basket
    </a>
  </div>
</nav>

<div class="container text-center mt-5">
  <h1>Welcome to Green Basket</h1>
  <p>Your one-stop online grocery shopping destination.</p>

  <button class="btn btn-success">
    Shop Now
  </button>
</div>

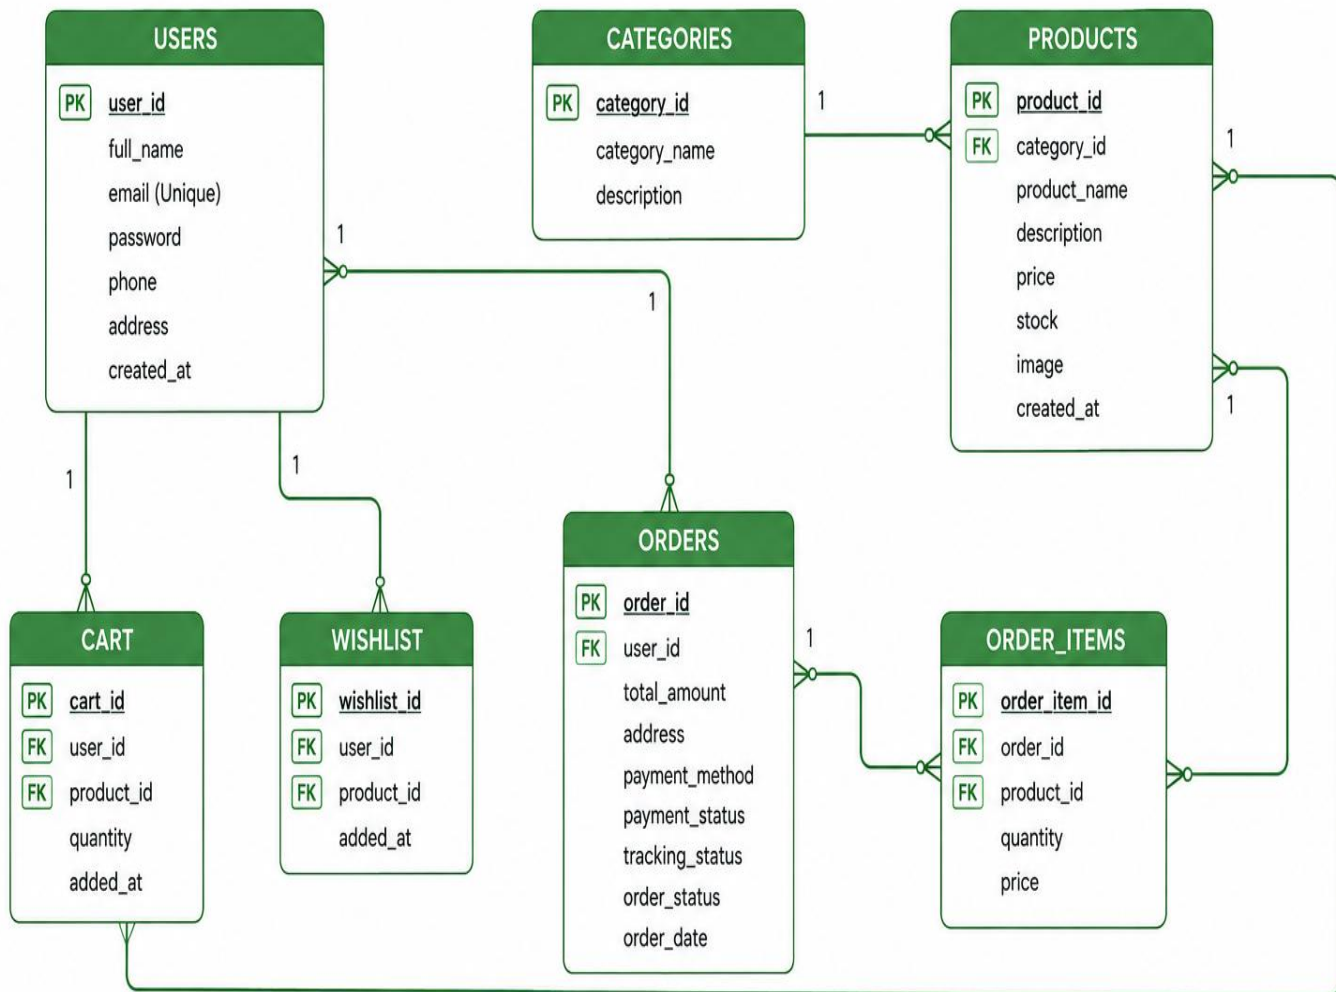

</body>
</html>
```

6.Learning outcomes (what I have learnt) :

After completing this experiment, students will be able to:

1. Understand the working of an online grocery delivery application.
2. Analyze the user interface and navigation of grocery e-commerce platforms.
3. Identify the key modules such as product catalog, cart, checkout, and order tracking.
4. Understand the role of payment methods and delivery management in online shopping.
5. Apply the gathered knowledge to design and develop a grocery shopping web application.
